

# CHELATION FORMULA

## Helpful in Preventing Heart Disease and Improving Circulation

### DESCRIPTION

Chelation Formula, exclusively from Medical Wellness Associates, is a supplement used as an alternative to intravenous chelation. Oral chelators can nurture blood vessels by stripping plaque from the arteries, emulsifying excess blood fats, removing excess calcium and cleaning out lipid deposits.

Chelation Formula is a safe and convenient option to the expensive and time-consuming trained medical staff administered chelation therapy.

### FUNCTIONS

Adults, as well as children, inhale contaminants in the air, as well as ingest them in food. Heavy metal contaminants, such as aluminum, cadmium, lead, and mercury, are major contributors to inflammation, impaired circulation, free-radical damage, and plaque build-up in the blood vessels and throughout the body. These known toxicities affect the heart, brain, nervous system, kidneys, liver, pancreas, and skin.

Chelation Formula contains EDTA, a powerful man-made amino acid (protein) that removes toxic metals (mercury, lead, cadmium, arsenic, aluminum) that have been deposited in the body's tissues and arteries. The toxins are then excreted from the body in the urine and feces.

EDTA also lowers blood calcium, and reduces the tendency of platelets to coagulate, which prevents inappropriate clotting that may block arteries. This in turn stimulates the enlargement of small vessels which causes circulation around a blockage.

Chelation Formula has been carefully developed to contain the right portion of minerals, trace elements, and other nutrients without the danger of toxic build-up or side effects. Each ingredient is selected in consideration of its absorbability, competitive relationship with other nutrients, allergenic potential, and long-term safety.

In addition to EDTA, Chelation Formula contains Sodium Alginate, Carragenan, N-Acetyl L-Cysteine, Garlic (bulb), L-Methione, Chlorella, Spirulina, and Bromelain. Sodium Alginate lowers serum cholesterol levels and reduces absorption of various metals. It is used in the prevention and treatment of hypertension.

N-Acetyl-L-Cysteine works like Vitamin C to raise glutathione levels in our body. Glutathione assumes a critical role in defense against free-radical damage. N-Acetyl-L-Cysteine protects against damage from cigarette smoke, radiation, chemotherapy and x-ray and aids in the treatment of blood and liver disorders.

*(continue on reverse)*

Garlic helps prevent platelet stickiness, lowers blood pressure, and has a beneficial effect on cholesterol metabolism and triglycerides. It is also helpful in reducing swelling and inflammation due to allergies and in treating earaches and yeast infections. Garlic reduces high blood pressure, decreases LDL cholesterol, and increases HDL cholesterol.

L-Methionine assists in the breakdown of fats and prevents buildup of fats in the liver and in the arteries. It aids in digestion, prevents muscle weakness, prevents brittle hair, and helps in the treatment of chemical sensitivities and osteoporosis.

Spirulina is an algae that is commonly found in tropical or subtropical waters. It enhances the reduction of excessive fat in the blood.

Bromelain, a Papaya Enzyme, is obtained from the pineapple plant. It is useful in strengthening blood vessels and is a natural anti-inflammatory.

## **INDICATIONS**

Chelation Formula is a natural dietary

supplement that may be helpful in preventing heart disease and improving circulation.

## **FORMULA**

### **2 Capsules Contain:**

EDTA.....	250 mg
Sodium Alginate.....	125 mg
Carragenan.....	125 mg
N-Acetyl-L-Cysteine.....	100 mg
Garlic (bulb).....	100 mg
L-Methionine.....	100 mg
Chlorella.....	50 mg
Spirulina.....	50 mg
Bromelain.....	1,500 mcu

## **SUGGESTED USE**

Adults take 3 capsules before bed or as directed by physician.

## **SIDE EFFECTS**

No adverse side effects reported.

## **STORAGE**

Store in a cool, dry place, away from direct light. Keep out of reach of children.
