

Product Information

Melatonin 20 mg

DESCRIPTION

Melatonin 20 mg, available from Medical Wellness Associates, promotes healthy angiogenesis balance, immune function and antioxidant activity to provide high capacity cellular support for tissues including the colon, breast, prostate and lungs.

FUNCTIONS

Cellular Health: Melatonin is primarily associated with supporting the body's natural sleep cycle, however recent scientific advances suggest that it may play a role in cellular health. More than a dozen preliminary clinical trials have examined the role of melatonin in supporting healthy cells and tissues, in part by maintaining healthy angiogenesis balance, promoting immune cell activity, and scavenging free radicals. Randomized studies have revealed the potential for melatonin to positively support colon, breast, prostate and lung tissues.

RECOMMENDATIONS

Adults take 1 capsule 1/2 to 1 hour before bedtime.

SIDE EFFECTS

Not to be taken by pregnant or lactating women. May have sedating effects and is for bedtime use only. This product may be contraindicated in depression, seasonal affective disorder, schizophrenia, autoimmune disease, diabetes or asthma. Common reported side effects include daytime drowsiness, headache, and dizziness, but these do not seem to occur any more frequently than with placebo. It has also been associated with depression, anxiety, abdominal cramps, irritability, nausea, vomiting or hypotension. Consult your physician for more information.

DRUG INTERACTIONS

Melatonin should not be taken in conjunction with antidepressants, beta blockers, MAO inhibitors or corticosteroids. It may be contraindicated with blood thinning medications. Consult your physician for more information.
